ZEISS Secacam 5 & 7

In nature with just one click.

Seeing beyond

EN_Secacam_Flyer_Nature 000000-2629-496 EN_52_035_00561

High detail recognition during the day and at night. Thanks to ZEISS quality.

Delivering clear, vibrant images during an eclipse or in low-light conditions is a significant challenge for cameras of all types. But with the ZEISS Secacams 5 & 7, you can see every movement in the field in greater detail and contrast than ever before. The highly sensitive motion sensor is always alert to trigger the infrared flash of the 50 black LEDs when motion is detected.

- Improved night imaging for even better detail recognition from a distance
- Faster shutter speeds at night for sharp images of moving objects
- Optimized images in daylight for even better detail recognition

Night-time shot

Daytime shot

All-year-round observation, enhanced research & more discoveries:

- **Discovering** species that are difficult to recognize, such as shy and camouflaged birds or migratory birds
- **Constant observation** at bird feeders or nesting boxes
- **Ecological research** with long-term data collection and proof of occurrence
